

Oracle Standard Edition Custom Disaster Recovery Solution

Cloud Creek Systems (CCS) is a leading provider of Oracle consulting services since 1996. We partner with small and midsize companies providing technical and strategic services to make sure your Oracle system meets your business needs now and in the future. CCS understands the resource constraints growing companies face and thus provide custom Oracle SE and SE1 Database solutions to meet your Disaster Recovery (DR) and replication requirements.

Why?

Custom DR solutions are created to meet your company’s unique business requirements and its budgetary constraints for Disaster Recovery and Replication needs. Common business requirements include the desire for less bandwidth overhead, more frequent backups and overcoming the cost constraints of the optimal Oracle Enterprise Dataguard solution.

Standard Service Features	
<ul style="list-style-type: none"> • Install Oracle software and create test database on target node • Business and Technical Analysis for your unique situation • Create the standby database (Manual not scripted) 	<ul style="list-style-type: none"> • Create & Test scripts for automatic standby database, archive logs, validations processes, and lag issues • Test connectivity to standby Database

How much does it cost?

10-15 Day Estimate T&M depending on complexity
 \$195 per hour Sr. DBA
