

## Oracle SE & SE1 Remote Monitoring Services

**Cloud Creek Systems (CCS)** is a leading provider of Oracle consulting services since 1996. We partner with small and midsize companies providing technical and strategic services to make sure your Oracle system meets your business needs now and in the future. CCS understands the resource constraints growing companies face and thus provide Oracle SE and SE1 Database Remote Monitoring Services.

### Simplify Your Business

CCS Remote Monitoring eliminates complexity in your Oracle environment. Designed for Oracle SE and SE1 customers CCS Remote Monitoring enables you to focus on your core business and never worry about your Oracle systems.

### Is database maintenance and administration eating up your DBA's time?

CCS Remote Monitoring allows your technical team to focus on your core business objectives that will help you company grow. This offering is ideal for companies that don't have dedicated Oracle DBA's and at a fraction of the cost of a full-time Oracle DBA. Get the insight you need into system performance and be able to make informed strategic decisions on future growth and technology needs. CCS Monitoring provides monthly reports with vital statistics and detailed analysis of system performance.
