- 2009 & 2007 Oracle Titan Award

Database Monitoring 24x7x365 w/ local staff

Firms find that Cloud Creek's DBA Managed Services are a fraction of the cost of adding in-house DBA staff. Budget savings are spent on core business goals. Cloud Creek's proactive support allows stakeholders to sleep at night knowing systems are being monitored 7x24.

Cloud Experts – 'Born in the Cloud', 'Hybrid' or 'Lift and Shift'

Best Practices available to exploit public or private cloud to gain specific business goals and budget priorities. Expertise in integration; performance tuning; legacy systems issues; upgrades; consolidation and management.

Oracle on Oracle

Migration of Oracle Application and Technology onto Oracle Engineered Systems result in significant license cost savings, performance improvements and simplified system management.

Cost Savings License Strategies

A holistic review of systems architecture and licensing can lead to identification of savings. Our 'soft audit' ensures compliance and right-sizing of products and quantities to support your business goals.

Specialized Skills for Pre-Sales POC or Post-Sales Deployment

Consulting can be bundled with software and/or hardware for installation, design, tuning, integration, HA and DR. Deploy systems with expert mentoring while ensuring future self-sufficiency.

Bucket of Hours 'How To' Support

Refillable 'bucket of hours' for 'ask the experts' as issues come up. Team members are local employees and are intimately familiar with your systems resulting in fast issue resolution.

Why Cloud Creek?

Cloud Creek Systems deploys Oracle technology using Best Practice pre-built templates developed over 21 years, creating fast results and rock solid systems. Services are delivered with a passion for problem solving and customer success. After a first project, 97% of our clients hire us for additional projects. That's how we have served over 300 local clients with 1600+ projects and won 8 National Awards in the last 10 years.

Cloud Creek Systems

Small to Mid-Size Business

Customer Use Cases

Born in the Cloud Startup

An industry data information startup hired Cloud Creek to design Cloud and Applications architecture. Cloud Creek illustrated the advantages of Oracle Cloud and Oracle Cloud development tools. The custom application collects information from clusters of devices nationwide and builds reports for device users.

Oracle DB replaces Microsoft SQL Server

A healthcare provider was running JD Edwards on Microsoft. Cloud Creek engaged with customer on consolidation project for Oracle applications and corporate databases. Cloud Creek designed Oracle on Oracle consolidation including migrating JD Edwards from SQL Server to Oracle DB

Consolidation on simplified Engineered Platform

Fast growing healthcare firm required data warehouse consolidation, integration and database security strategy. Cloud Creek designed multi-layered solution spanning Hardware and Software layers, including both Exadata, Private Cloud Appliance, ZFS and ODA for specific tasks.

Backup DBA Service enables customer to focus on new projects

A fast growing SaaS provider hit roadblocks in supporting 7x24 database operations. Cloud Creek was hired to back up the DBA during crunch time and after hours. The company needed to keep their DBA from burning out because of his deep business knowledge. This also allowed the firm to hire additional programmers (rather than more full-time DBAs) to move forward on multiple stalled Oracle projects.

Diagnosis and Tuning for Social web site with millions of users

A leading social site requires high performance and uptime. Cloud Creek is expert partner responsible for tuning and diagnosis of SQL and architecture bottlenecks. Cloud Creek uses team approach for problem solving. Team members average 10+ years of DBA experience.

EBS Upgrade and Project Management

Manufacturing customer required EBS and DB upgrade to R12 and 12c. Cloud Creek teamed with client to ensure all aspects of upgrades went smoothly and were project managed successfully. Cloud Creek handled both Tech and Apps part of project.

Cloud Middleware and Database

Large California insurance company asked Cloud Creek to analyze and recommend Business Intelligence architecture. Cloud Creek assisted company in deploying BI Cloud Service to meet analytics requirements. Cloud Creek continues to be trusted advisor on corporate hybrid cloud architecture
